

Homework problems:

Exercise 3.1 (8 points). Answer all the questions from the Moodle-Quiz **Intro to data - Experiments, Observational Studies, ...**.

The quiz is available from April 27, 19:00 until May 04, 09:00. You have 90 minutes to answer the questions.

Remark: The points for this problem count for the grade bonus.

Solution: To see the solution to this problem, please reopen the quiz and click on *Review*.

Exercise 3.2. Solve all the exercises shown on the page Problem H.3.2 - Nobel Laureates until May 04, 09:00.

Remarks:

1. The points for this problem **do not count for the grade bonus**. But you can upload your solution to Moodle until **May 04, 09:00** to familiarize yourself with the process of uploading files on Moodle. Use the link given on Moodle under the topic "Peer-Review Homework Problem - Try Out" to upload your solution.

Your upload consists of the file `starter_nobel_laureates.qmd` and the HTML file `starter_nobel_laureates.html`, which you created by rendering the Quarto file. Make sure that the HTML file is properly rendered.

Note that you **SHOULDN'T** write your name on your submission. You are identified by signing in on Moodle.

2. You will also have the ability to grade your own solution on Moodle. You can try this out between May 04, 19:00 and May 11, 9:00.
3. Note that there is a template file `starter_nobel_laureates.qmd` on Moodle for this problem (in the folder *Data, Quarto and R files - Sample solutions and previous problem sets*).

Solution: Check again the page Problem H.3.2 - Nobel Laureates to find the solution to the problem as well as some **grading instructions**.

Exercise 3.3.

Complete the IDSST R tutorial `data-wrangling` until May 04 and start working on the tutorial `exploratory-data-analysis`.
